

Streamline™ Ultrasonic Inserts

The Quality You Expect with a Redesigned Look.

Clinicians can spend as much as two hours per day treating patients with power scalers. Knowing how important tip designs, handle styles, frequencies and water delivery methods are crucial when picking the perfect ultrasonic insert, we are always hard at work not just creating new superior inserts, but also further perfecting our current offerings. **Our most popular Streamline™ Ultrasonic Inserts have been redesigned to include a slimmer and sleeker look and grip.**

Streamline™ Ultrasonic Inserts introduce a newly-designed slim grip with new grip pattern.
