AdvantaClear Surface Disinfectant

Designed to clean and disinfect dental surfaces with fast 1-minute kill time*

When choosing a surface disinfectant, there are many product features a clinician should look for, including contact time, surface compatibility, cleaning and disinfecting properties, low allergenicity, easy-to-follow directions, and acceptable storage and disposal requirements. It should also have a registration number from the EPA and should—at a minimum—be labeled as a hospital disinfectant, stating that it is effective against the test microorganisms *Salmonella choleraesuis*, *Staphylococcus aureus* and *Pseudomonas aeruginosa*.

Hu-Friedy AdvantaClear surface disinfectants are EPA registered and kill a broad spectrum of disease-causing microorganisms, including HIV-1, HBV, HCV, MRSA, tuberculosis, influenza A virus (H1N1), *Salmonella enterica*, ESBL-producing *E. coli* and many other pathogens.

"AdvantaClear is a convenient, ready-to-use intermediate-level disinfectant that is designed to clean and disinfect surfaces with a fast-acting 1-minute contact time," said Holly Way, Sr. Product Man-

ager, IMS & Infection Prevention for Hu-Friedy. "And faster kill times mean faster turnover."

The disinfectant is a 2-in-1, offering a quick and easy way to effectively clean and disinfect surfaces. AdvantaClear is designed to be compatible with a wide range of surfaces within the dental environment such as acrylic, aluminum, brass, copper, stainless steel, chrome, plastics, vinyl, and more.

"AdvantaClear disinfectant wipes have a powerful scrubbing ability to quickly and effectively clean surfaces, while still being safe on a wide range of clinical surfaces," Way added.

AdvantaClear also helps eliminate odor-causing bacteria without any harsh fragrance, while the low alcohol formula will not affix blood and soil to surfaces.

* This product kills the following organism in 2 minutes on precleaned, hard, nonporous surfaces at room temperature: *Mycobacterium bovis* BCG (TB).

TOP 5 BENEFITS OF ADVANTACLEAR SURFACE DISINFECTANT

- Fast-acting 1-minute contact time*
- Safe on surfaces
- Cleans & disinfects
- Fragrance-free
- Low alcohol formula
